WHO ARE WE?

INDEPTH SCIENTIFIC COMPANY LIMITED is a Company that was founded with the overall intention of providing biomedical, health laboratory and public health supplies to the East Africa Region (Kenya, Uganda, and Tanzania). The Company is incorporated both in Kenya and Tanzania and has a procurement subsidiary based in the United States of America.

Our Vision

To become the leading biomedical, public health and health laboratory supplier in the region by timely providing quality and cost effective biomedical laboratory, public health supplies and superior technical support to research and health facilities within the East and Central African Region.

Guiding Principles

For a long time now there has been a persistent threat to the health of populations in the African continent posed by communicable and non-communicable diseases. This phenomenon has always invariably been exacerbated by a widespread ignorance amongst a majority of the people and their leadership not only of the exact nature and character of the diseases but also the manner in which they are spread and the type of preventive materials and/or equipment available for use by their Public health personnel to keep them from getting infected while performing their tasks. The International community on the other hand has only recently and belatedly so come to the realization that communicable diseases essentially constitute a National security concern in their respective countries regardless of the wide differences in the geographical regions in which they arise and/or thrive. Of course this is an inherent consequence of the movement amongst the populations of the world and which movement has increasingly become easier, faster and more efficient in consonance with tremendous strides in communication and transport and the movement towards globalization.
COMPANY STRUCTURE

INDEPTH COMPANY has the following main organs of governance and management:

- Managing Director
- Technical Director
- General Managers
- Sales and Marketing Manager
- Marketing & Procurement Officers
- Information Technologist
- Accountants
- Technical/ Logistics Officers

SUPPLIES AND SERVICES

Indepth scientific Company Ltd maintains a full Service team offering a wide range of servicing options to support your equipment purchases. We also service and maintain equipment and machines that are not supplied by Indepth Scientific Company Ltd.

Our technical team will visit your laboratories to quote for installations as well as annual service contracts.

OTHER SERVICES

I. Emergency Service Calls

With Indepth scientific Company Ltd Service Department, you can rely on the efficiency and expertise that comes with experience. In all instances we seek to minimise your downtime and provide a practical, cost effective and timely solution to whatever problem you might experience with your equipment.

II. Service Contracts

We believe that all equipment serviced regularly, will give a higher degree of performance and reliability and hence value for money used in the purchase of such
equipment. Such protection can be provided by a Service Contract which guarantees you reassurance and peace of mind at a known cost.

a) On-site Contracts

- One routine maintenance visit

b) In-House Contracts

Designed for the smaller, lower cost equipment or machine, serviced in-house and returned.
